

Art by Preference PEN TEMPORARY TATTOO

The following information was taken directly from the product's company along with additional tips from reputable sources. Subject to revision for accuracy and safety.

Warning: Please consult with your healthcare professional before using this product if you have pre-existing health conditions, or after use if you experience redness, itching, or swelling. Skin for application must not be broken or irritated.

Tattoo Ink

Patented plant-based ink safe for skin.

Application

Skin must be hydrated so drink plenty of water the day before and use a water-based moisturizer no less than one hour before your appointment begins. Skin must be gently cleaned before the design. A pen is used directly on your skin to draw the design.

Developing

Your design will take 10 minutes to dry and then an additional 1-2 hours with a development patch. You need to be able to keep the tattooed area still for at least one hour before removing the patch. Your tattoo may last from 1-7 days.

Aftercare

Allow 6 hours before showering or doing activities that will make you sweat.

The first time you wash your tattoo, the ink may fade slightly. Your tattoo will continue to darken and develop into a dark blue/black color during the next 24-36 hours after application.

Cover your tattoo overnight to prevent transfer to bedding or other skin. It's best to wear breathable clothing that covers your entire tattoo.

If you would like the same tattoo refreshed, please make an appointment when you see it beginning to fade. Availability is not guaranteed.
