

Art by Preference HENNA TEMPORARY TATTOO

The following information was taken directly from the product's company along with additional tips from reputable sources.

Warning: Allergies to natural henna can occur, although they are extremely rare. Always first test henna on a small part of your skin before proceeding. Henna is not recommended for children under the age of 8. NEVER apply henna to an infant. Anyone with allergies to citric acid, eucalyptus oil, lavender oil, or any of the ingredients in the solution should not use this product. For external use only. Do not ingest. Avoid placement in areas that sweat or hold moisture.

HENNA

Henna is the powdered leaves of a tropical shrub, used as a dye to color the hair and decorate the body. The henna powder used is 100% pure, high quality henna powder and the solution are made with 100% natural ingredients.

Application

Skin must be washed before application. A paste is squeezed onto your skin, which will stain it.

Developing

Avoid smudging, especially while the tattoo is still wet.

After a minimum of 3-6 hours have passed, **peel off dried henna paste with fingers, and rub off any residue.** Overnight will give the best results. If your tattoo is done close to your bedtime, put a protective barrier between your tattoo and your bed coverings. **DO NOT USE WATER** or scrub to remove.

For best results avoid water contact with the tattooed area for the following 24 hours.

Henna design will progress from an orange color to the traditional deep reddish brown color over the next two days.

A sealant can be applied to prevent early flaking.

Aftercare

- Avoid swimming in a chlorine pool
- Avoid scrubbing or harsh soaps
- When possible, avoid rubbing and clothing that can create friction against your tattoo
